LLM Axis

GenAI & Agentic AI Program

12-Weeks Roadmap

Week-1
Foundations of Generative AI & LLMs

Week-2
Prompt Engineering & LLM Behavior

Week-3
Python & LLM API Integration

Week-4
Building LLM Applications with LangChain

Week-5
Embeddings & Vector Databases

Week-6
Retrieval-Augmented Generation (RAG)

Week-7
Agentic AI & Autonomous Agents

Week-8
Multi-Agent Systems & Orchestration

Week-9
Tool Calling & Automation Pipelines

Week-10
Evaluation, Guardrails & Optimization

Week-11
Deployment, CI/CD & Production Scaling

Week-12
Capstone Project & Real-World Use Cases

About LLM Axis

LLM Axis

LLM Axis is a global AI training and consulting company empowering students, job seekers, and professionals through industry-standard, project-based learning. Specializing in Generative AI and Agentic AI, we deliver live, hands-on programs with real-world applications and expert mentorship. We also partner with businesses worldwide to provide AI consulting, custom solutions, and corporate training—enabling both individuals and organizations to stay competitive and thrive in the AI-driven economy.

Gen AI & Agentic AI Internship Program

Unlock the skills to design, build, and deploy real-world GenAI and Agentic AI applications through an intensive 12-week journey. This industry-aligned program takes you from LLM fundamentals to advanced architectures like RAG, autonomous agents, multi-agent systems, and scalable API-driven solutions. With weekly hands-on projects and a production-ready capstone, you'll gain practical expertise in prompt engineering, Python-based LLM integrations, LangChain, vector databases, automation workflows, and cloud deployment—empowering you to confidently build, optimize, and launch next-generation AI products.

LLM Axis

What learners gain:

- Strong GenAI foundation – LLMs, RAG, and Agentic AI concepts
- Real build experience – End-to-end GenAI applications
- Production mindset – Deployment, CI/CD, monitoring & scaling
- Agentic AI expertise – Autonomous & multi-agent workflows
- Hands-on portfolio – GitHub projects with real use cases
- Industry confidence – Skills aligned with current AI roles

LLM Axis

Our Course curriculum

Week 1

Topics

- LLM Fundamentals & GenAI Architecture
- Advanced Prompt Engineering
- RAG Fundamentals
- Hands-on: RAG App

Details

- Models, transformers, inference, tokens, latency
- System prompts, CoT, ReAct patterns
- Embeddings, vector DBs, chunking, retrieval
- Build end-to-end Q&A app

You'll cover

OpenAI python ANTHROP\C

Week 2

Topics

- OpenAI / Claude APIs
- Function Calling & Tools
- Memory Systems
- Hands-on: Memory-enabled App

Details

- APIs, cost control, token mgmt
- Structured outputs, tool routing
- Short & long-term memory, context windows
- Context aware GenAI app

You'll cover

Claude Hugging Face OpenAI

Week 3

Topics

- Advanced RAG Patterns
- Evaluation & Guardrails
- Multi-modal GenAI

- Hands-on: Multi-modal App

Details

- Hybrid search, re-ranking
- Prompt safety, hallucination control
- Text, image, speech pipelines
- Build multimodal assistant

LLM Axis

OpenAI API · FastAPI · python

Week 4

Topics

- Automation Fundamentals
- No-code + Code Automation
- Tool Orchestration
- Hands-on: Automation Project

Details

- Workflow orchestration concepts
- n8n, Zapier, Python
- Multi-step pipelines
- End-to-end workflow

LangChain · n8n · zapier

Week 5

Topics

- Advanced API Orchestration
- Streaming & Async Systems
- Security & Privacy

- Hands-on: Secure GenAI App

Details

- Microservices + GenAI
- Real-time GenAI apps
- PII handling, compliance
- Secure deployment

Pinecone · Chroma

Week 6

Topics

- Agentic Thinking Introduction
- State Machines & Planning
- Memory + Reflection
- Hands-on: First Agent

Details

- Task planning, decision loops
- Agent control flows
- Self-improving agents
- Single autonomous agent

Pinecone LangChain

Week 7

Topics

- Agent Frameworks
- Tool-based Agents
- Autonomous Task Execution
- Hands-on: Production Agent

Details

- LangGraph, CrewAI, AutoGen
- Dynamic tool routing
- Goal-driven workflows
- Deployable agent

LangGraph crewai Autogen

Week 8

Topics

- Multi-Agent Architectures
- Inter-agent Communication
- Shared Memory Systems
- Hands-on: Multi-Agent Workflow

Details

- Coordination patterns
- Message passing, delegation
- Vector + graph memory
- Collaborative agents

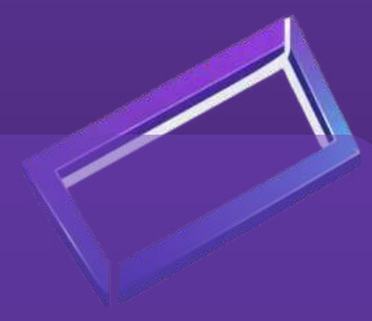

crewai python LangGraph

Week 9

Topics

- Long-running Agents
- Observability & Guardrails
- Evaluation & Benchmarking
- Hands-on: Autonomous System

Details

- Event-driven & persistent agents
- Monitoring, logging
- Agent quality checks
- End-to-end autonomous app

n8n zapier OpenAI

Week 10

Topics

- Enterprise Agent Architecture
- Security & Compliance
- Cloud Deployment
- Hands-on: Enterprise Agent

Details

- Scalability, infra
- Enterprise readiness
- AWS / Azure pipelines
- Production deployment

Weights & Biases OpenTelemetry OpenAI

Week 11

Topics

- Capstone Design
- Capstone Build Phase I
- Capstone Build Phase II
- Testing & Optimization

Details

- Architecture & planning
- Core agent build
- Multi-agent integration
- Load + security testing

docker aws Azure GitHub

Week 12

Topics

- Final Integration
- Deployment & Monitoring
- Demo & Documentation
- Certification & Showcase

Details

- End-to-end solution
- Live deployment
- Portfolio prep
- Final evaluation

OpenAI LangChain aws

WHO CAN JOIN THIS PROGRAM?

- For anyone who doesn’t want to get replaced by AI—but wants to be the one who builds it.
- For professionals who refuse to be left behind as AI becomes the new baseline skill.
- For students who know that “basic degrees” won’t cut it in an AI-first job market.
- For founders who don’t want to watch competitors launch AI products before they do.
- For career switchers who want to enter the fastest-growing tech wave before it’s too late.

WHY ENROLL?

- Industry-ready GenAI skills – LLMs, RAG & Agentic AI
- Hands-on learning – Weekly mini-projects + real capstone
- Fast-track growth – End-to-end GenAI mastery in 12 weeks
- Modern AI stack – LangChain, LangGraph, CrewAI, FastAPI, Vector DBs, Cloud
- Real deployments – Build, ship & scale AI apps on cloud
- Portfolio-ready – GitHub projects recruiters care about
- For all backgrounds – Students, professionals, founders & switchers

Trainer's Profile

15+ years experience in Data, AI, and Cloud

Key Clients:
Deloitte, Centric Consulting, Pretium, Accenture, Idea Labs, Great Learnings.

Trained 1,000+ professionals & students

Delivered 50+ Training Programs

Ganesh Adabala
Ex-MicroSoft & Amazon

Ganesh Adabala is a seasoned **Data & AI Trainer** with **15+ years** of global technology experience across companies such as **Microsoft, Amazon, Eurofins, and Neudesic**. He specializes in helping organizations and professionals adopt **Generative AI, Agentic AI, Data Analytics, and Cloud technologies** to build business-ready solutions that create measurable impact.

Ganesh blends **practitioner expertise + hands-on teaching** to make complex AI concepts practical, accessible, and immediately applicable. His delivery style emphasizes **real business use cases,** workflow integration, tool-based execution, and ROI-driven adoption.
